| PROJECT NAME: CRACK SEAL FO PROJECT NUMBER: ST090690 | R PAVEMENT (CASH CIP PROJEC | CT) | | |
|--|--|--|---|---|
| Description: Installing crack seal on asphalt cracks and sealing them with a hot pour rubb apply sealant. The sealant consists of the rubl material into the crack. The squeegee also praking and drive on the street within a couple | erized asphalt product. The contractor uses a per and asphalt that is heated to about 375 di events a build of material on the surface and | a compress air to remove the dirt and vege egrees. The sealant is applied using a heat ridges from forming, thus improving the q | tation from the cracks and joir ed wand and then a squeegee uality of ride for motorist. Resi | ts. The next step is to is use to force the |
| Justification: To adequately and properly managed failing after moisture is introduced to deters water from seeping to the subgrade be pavement by 3 to 5 years. This is achieved by the 2009 CIP Bond Committee. | hrough the cracks in pavement. Crack sealing neath the road surface. Crack sealing the stre | the cracks with hot rubber sealant to the eets and alleys is one the most cost effective | pavement extends the life of p | avement because it extend the life of |
